

Lorem Ipsum

"Neque porro quisquam est qui dolorem ipsum quia dolor sit amet, consectetur, adipisci velit..."

"There is no one who loves pain itself, who seeks after it and wants to have it, simply because it is pain..."

What is Lorem? Why do we use it?

Lorem Ipsum is simply dummy text. It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum has been the industry's standard dummy text ever since 1966, when Letterson used Lorem Ipsum because it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English. Many desktop publishing packages and web page editors now use Lorem Ipsum as their default model text, and a search for 'lorem ipsum' will uncover many web sites still in their infancy. Various versions have evolved over the years, sometimes by accident, sometimes on purpose (injected humour and the like).

Where does it come from? Where can I get some?

Contrary to popular belief, Lorem Ipsum is not simply random text. It has roots in a piece of classical Latin literature, discovered the first time by a professor at Hampden-Sydney College. If you are going to use a passage of Lorem Ipsum, you need to be sure there isn't anything embarrassing hidden in the middle of text. All the Lorem Ipsum generators on the Internet tend to repeat predefined chunks as necessary, making this the first true generator on the Internet. It uses a dictionary of over 200 Latin words, combined with a handful of model sentence structures, to generate Lorem Ipsum which looks reasonable. The generated Lorem Ipsum is therefore always free from repetition, injected humour, or non-characteristic words etc.

The standard chunk of Lorem Ipsum used since 1966 is reproduced below for those interested. Sections 1.10.32 and 1.10.33 from "de Finibus Bonorum et Malorum" by Cicero are also reproduced in their exact original form, accompanied by English versions from the 1914 translation by H. Rackham.

Apache PDFBox

- **License:** Apache 2.0 (Permissive for commercial use).
- **Best For:** Core text extraction, form filling, and basic PDF manipulation.
- **Pros:** Completely free, highly reliable, active community, and reads standard Unicode text easily.
- **Cons:** Struggles heavily with complex visual layouts, multi-column reading orders, and tables. [[1](#), [2](#), [3](#), [4](#), [5](#)]

Apache Tika

- **License:** Apache 2.0.
- **Best For:** High-level text and metadata abstraction.
- **Pros:** Excellent if you want a single interface to parse PDFs alongside other file types like Word docs, images, or emails. It wraps around PDFBox to give you a unified `.toString()` output.
- **Cons:** Lacks granular control over low-level PDF components. [[1](#), [2](#), [3](#), [4](#)]
